CHLORIDE

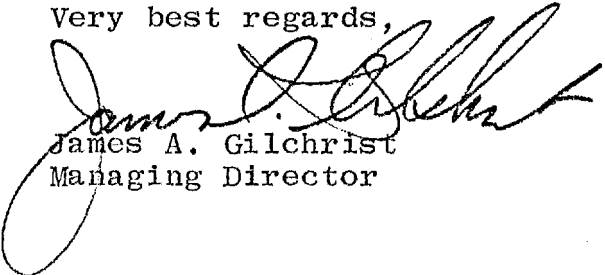

Admiral Stansfield Turner
Director
Central Intelligence Agency
Washington, D. C. 20505

Dear Admiral Turner:

It was a pleasure meeting you. I enjoyed your talk very much.

Chloride is continuing its research in the sodium sulfur battery that Michael Edwardes mentioned to you last year. Its progress is good. We expect to put an experimental battery into an electric delivery van in September/October 1978. We are going into pilot production quantity of batteries, if all goes well, in early 1979.

Very best regards,

James A. Gilchrist
Managing Director
